## DESIGNED FOR AGED CARE

### Key Benefits:

- Reduce the risk of falls
- 40mm foam padding
- Includes "Y" Lead
- Wireless option
- Folds for easy storage
- Reliable & durable
- Integrates into most systems

### Floor Cushion Sensor Mat

Lindon Group provides pressure-sensitive Cushion Floor Sensor Mats designed to alert staff should residents leave their beds. Our Cushion Sensor Mats also offer an extra 40 mm of foam padding if the resident falls while attempting to stand or walk. Unlike most Sensor Mats on the market, our Cushion Floor Sensor Mats have a built-in "Y socket", which provides an extra socket to connect your existing nurse call pendant. This allows the resident to have a pendant and sensor mat attached to the one nurse call point. Our Cushion Sensor Mats also fold for easy storage and portability.

### Wireless Option

With the optional wireless transmitter and receiver units, you now have the option to go wire-free. With no cables from the floor sensor mat to the call point, it gives the flexibility of moving the floor sensor mat around the room without the need to unplug cables or the hassle of extension cords. In addition, with no wires across the floor, it eliminates a potential trip hazard.
